RESEARCH INTERESTS	I analyse political issue attention and the European refugee crisis using modern text as data approaches. I have also worked on missing-data problems (weighting, multiple imputation). Generally, I am interested in the intersection between social sciences, statistics, and machine learning.	
EDUCATION		
10/14 – present	<i>Humboldt University of Berlin</i> (Berlin, Germany) M.A., Social Sciences	
08/15 – 06/16	<i>New York University</i> (New York City, USA) Global Visiting Scholar in Applied Quantitative Research Methods
